

RODRIGO SAAVEDRA

FULL STACK WEB DEVELOPER | REACT | TYPESCRIPT | JAVASCRIPT

Greater Buenos Aires West | 20-40633063-0 | 20/09/1997 | 20/09/1997 | [+54 11 3509-4661](tel:+541135094661) | rodrigonasaavedra@gmail.com | [LinkedIn](#) | [GitHub](#)

ABOUT ME

Full Stack Web Developer with a background in QA Testing and IT Support, focused on scalable software and code quality. Experienced in JavaScript/TypeScript ecosystems (React, Node.js), Python, and Cloud services (AWS). Analytical and highly collaborative profile, geared towards platform optimization and the integration of modern Artificial Intelligence solutions.

TECHNICAL SKILLS & METHODOLOGIES

- Front-End & Languages: JavaScript (ES6+), TypeScript, React, HTML5, CSS3, Tailwind CSS.
- Back-End & Databases: Node.js, Express.js, Python (FastAPI/Flask), RESTful APIs, PostgreSQL, MySQL, MongoDB.
- Cloud, DevOps & AI: AWS (EC2, S3, CloudWatch, Route 53, Serverless), Docker, CI/CD (GitHub Actions), AI Integration, Prompt Engineering.
- Testing, QA & Tools: QA Testing (Functional, Regression), Jest, Postman, Root Cause Analysis, Git/GitHub, Jira, ServiceNow.
- Methodologies & Environments: Agile Methodologies (Scrum, Kanban), Git Flow, Linux, Windows, macOS, TCP/IP Networking, PowerShell.

PROFESSIONAL EXPERIENCE

Jan 2025 – May 2026 | GRUPO MSA | QA Tester

- Managed and tracked end-to-end incident and defect documentation across web and digital platforms.
- Analyzed logs and Root Causes to identify the origin of issues in code and infrastructure.
- Performed technical diagnoses and collaborated closely with Development teams for agile bug resolution.
- Contributed to early detection of critical defects in high-demand systems, ensuring stability and strict SLA compliance.

2021 – 2023 | UPLIVE | IT Support Analyst

- Delivered advanced technical support for users and digital platforms, conducting system troubleshooting and log analysis.
- Managed and prioritized critical incident tickets, optimizing resolution times and technical team escalations.

PROJECTS & EVENTS

- **VocalizAR – AI Development (Python):** Assisted reading application featuring playback controls and interactive teleprompter, integrating advanced artificial intelligence models (CosyVoice 3) for voice synthesis and processing. [Link](#)
- **InformAR – Data Analytics & Transparency (TypeScript):** System designed to extract, process, and cross-reference public data for municipal transparency and auditing, implementing automated scripts for information analysis. [Link](#)
- **Invitely – EventTech Platform (Full Stack):** End-to-end digital solution designed for the creation, distribution, and validation of smart invitations for large-scale events, optimizing user experience and real-time attendee check-in. [Link](#)
- **AWS Hackathon (August 2026):** Collaborative development of a serverless solution using AWS services and Artificial Intelligence agents (Go Agentic with Serverless). [Link](#)
- **JPMorgan Chase Hackathon CodeForGood (August 2026):** Participated in the development of a web solution for the NGO Forge Foundation. [Link](#)

EDUCATION & COURSES

- 2024 – Present: Associate Degree in Web Programming | Universidad Nacional del Oeste
- 2026 – Present: Full Stack Web Development with AI + Employment Training | Educación IT (JPMorgan, NCR, Edenred, Fundación Pescar) (+300 Hrs)
- 2026: Data Analytics with Python | Talento Tech
- 2024: Full Stack Web Development | Global Learning
- 2017: PC Assembly & Hardware Repair Technician | CFP N°401 (200 Hrs)

LANGUAGES

- English: Upper-Intermediate (B2+) • Portuguese: Intermediate (B2) • French: Intermediate (B2)
